

# Better Business for a Better World: Connecting Principle and Profit to Build Sustainable Businesses

Do you believe that businesses can be enjoyable and inspiring places to work? That they can be profitable while contributing to the well-being of all stakeholders, including the wider community? That they can help build a better world? This book explores how businesses can contribute to a more sustainable world. John Elkington, co-founder of Volans and SustainAbility, and co-author of *The Power of Unreasonable People* endorses *Better Business for a Better World*. In the revised 2012 edition of his 2000 book, *Better Business for a Better World*, Peter Bruce looks at ways in which business people can more fully engage the moral and values components of the sustainability agenda. His aim of reconciling science with religion is a vital and immensely challenging one. A deeply considered, provocative book.
