

Experimenting with Truth: The Fusion of Religion with Technology, Needed for Humanity's Survival (Pergamon International)

Experimenting with Truth: The Fusion of Religion with Technology, Needed for Humanity's Survival presents the insights of the mutually reinforcing aspects of the Christian faith and modern science. The book is composed of only three chapters and begins with an explanation of the technology's need for religion's hegemony. Chapter 2 attempts to show that science-based technology and religion share a common belief in the nature of the most fundamental reality. The last chapter details the most accurate, multidimensional picture or sculpture of reality.
