

Public-Private Partnership Infrastructure Project: Case Studies from the Republic of Korea: Volume 1: Institutional Arrangements and Performance (ESA SP)

The Republic of Korea has rich experience in implementing public-private partnership (PPP) projects for almost a decade. This experience provides valuable lessons for most developing member countries (DMCs) and that merits wider dissemination. This report prepared by the Korea Development Institute (KDI) presents an in-depth assessment of the different components of PPP framework of the Republic of Korea, including comparing and contrasting the success factors of the Korean PPP model with the experience of other countries through invited presentations on PPP frameworks and multisector case studies. This publication aims to support the efforts of DMCs engaged in the development of appropriate institutional PPP framework and regulatory reforms along with a well-defined and transparent financial assistance and risk-sharing framework, for facilitating private sector involvement through PPPs.
